ABSTRACT

This document provides the common curriculum goals for the state of Oregon in personal finance, an area of study that relates basic economic concepts and practices to the financial concerns of consumers. These goals were designed to define what should be taught in all public school settings. The common curriculum goals in personal finance are organized in five strands: (1) financial planning; (2) credit; (3) purchase of goods and services; (4) rights and responsibilities in the marketplace; and (5) selected essential learning skills. There are 31 goals in all, 13 representing the common knowledge and skills in personal finance and 18 representing selected essential learning skills. (KC)

Oregon Schools—A Tradition of Excellence

FCREWORD

Following the adoption of the Oregon Action Plan for Excellence in 1984, the State Board of Education embarked on a curriculum improvement project to define the goals of education for all public school students in Oregon. These goals, called *common curriculum goals*, have been developed by the state in all required subject areas with the assistance of numerous teachers, administrators and other interested citizens.

This document provides the common curriculum goals in personal finance, an area of study that relates basic economic concepts and practices to the financial concerns of consumers. These goals were designed to define what should be taught in all public school settings, keeping in mind the crucial role of the local district to tailor instruction to the needs and abilities of its students. Through the combined efforts of educators, business interests and labor, implementation of these goals should help students develop a solid foundation of knowledge, skills and responsible attitudes needed to manage their personal resources effectively.

We continue to learn how to provide children with the very best in public education. In this spirit, the staff members at the Oregon Department of Education welcome your comments and questions. For further information about these goals and their implementation, please contact the specialist for Personal Finance Education directly at 378-3602.

ACKNOWLEDGMENTS

Grateful acknowledgment is made to the members of the goal writing committee who shared their thinking and experiences as classroom teachers and administrators, and contributed many hours to the development of the common curriculum goals.

In addition, recognition is due the numerous individuals involved in the development of the **Personal Finance Education Guide**, published by the Oregon Department of Education in 1981. This document served as the basis for the development of the common curriculum goals.

INTRODUCTION

THE OREGON ACTION PLAN FOR EXCELLENCE

The Action Plan identified seven areas of improvement, one of which called for a statewide definition of what students should learn:

The Oregon Department of Education, working with local school districts and higher education institutions, shall define the required **common curriculum goals** for elementary and secondary schools in terms of the learning skills and knowledge students are expected to possess as a result of their schooling experience.

Local school districts, with assistance from the Oregon Department of Education, shall be responsible for organizing the curriculum and delivering instruction to achieve the common curriculum goals.

Common Curriculum Goals

The first stage in defining the Common Curriculum Goals was to develop the *Essential Learning Skills*— the basic skill and performance expectations for all students in the areas of reading, writing, speaking, listening, mathematics, reason; and study skills. The second and present state is to develop Common Knowledge and Skills in individual subject areas. Together with the *Essential Learning Skills*, they form the Common Curriculum Goals for all students.

A. Essential Learning Skills

The Essential Learning Skills are considered basic to all students' learning, and all teachers are expected to provide instruction in these skills. Only to the degree that students develop these skills and form the habit of using them, can instruction in subject matter areas be successful. The skills are not specific to any one discipline but provide a link across all disciplines. Furthermore, the skills do not grow in isolation from content; they are strengthened through practice and use in all subject areas.

B. Common Knowledge and Skills

Looking beyond the *Essential Learning Skilis*, this document derines more fully what are considered to be the essentials in a strong Personal Finance Education program. Each district will want to extend and elaborate upon this base in order to create its own unique, comprehensive Personal Finance Education curriculum. Students should have the opportunity to demonstrate their achievement in a variety of ways. Equatopportunity to learn and the special needs of students are printary considerations in determining acceptable performance levels.

State Standards

The Common Curriculum Goals as presented in this document receive their authority from the Oregon State Standards for Public Schools, OAR 581-22-420 and 581-22-425. These rules were amended by the State Board of Education in January 1986.

ORGANIZATION

The common curriculum goals in personal finance are organized in five strands:

- 1.0 Financial Planning (1.1-1.6)
- 2.0 Credit (2.1-2.2)
- 3.0 Purchase of Goods and Services (3.1-3.2)
- 4.0 Rights and Responsibilities in the Marketplace (4.1-4.3)
- 5.0 Selected Essential Learning Skills (5.1-5.18)

There are 31 goals in all, 13 represent the common knowledge and skills in personal finance, and 18 represent selected Essential Learning Skills.

The grade level outcomes associated with the Essential Learning Skills have been integrated into the grade level outcomes of the common knowledge and skills in order to help teachers see how

these skills can be taught in conjunction with the content. It is not required that teachers actually pair the instruction of content and skills as shown; rather, the integration is intended as a suggestion for implementation. Overall, however, **instruction** should be geared to the level of the grade level outcomes.

In tracking student progress in the con.mon curriculum goals in personal finance, attention should be focused on the 31 goals, not on the specific grade level outcomes. The grade level outcomes are indications of the kind of knowledge and skills expected of students as they work toward achievement of the goals; however, it is not required that instruction and assessment be tracked at this level. Teachers, however, should be able to provide written evidence of instruction and assessment at the goal level.

INSTRUCTIONAL MATERIALS

The common curriculum goals in personal finance are designed to a_{ij} ow the local district and staff to make all decisions regarding instructional materials and methodologies. Because there is **no textbook adoption** in the area of personal finance, districts are free to choose whatever materials they feel best meet the goals and fit the needs and interests of their students. They should make purchases on a more regular basis in order to assure that the information presented is accurate and up-to-date as required by state standards.
